

Automation Workflows Marketplace & Agency Portal

Complete overview, value proposition, technical architecture & business model

1. Executive Summary & Core Value Proposition

What is AutoFlows Hub?

A specialized B2B Automation Marketplace and Agency portal where businesses discover, test, and deploy production-ready workflow automations (WhatsApp Cloud API, AI GPT-4o, E-Commerce, CRM, Invoicing) to eliminate manual tasks and save 100+ hours monthly.

2. The 3 Pillars of the Marketplace

1. Verified Catalog

Categorized library with live search, filters (WhatsApp, E-Commerce, CRM, AI, Finance) and difficulty tiers (Beginner to Advanced). Ready for 1-click deployment.

2. Visual Flow Viewer

Interactive step-by-step timeline showing Triggers, AI actions, Condition routers, and CRM syncs. Gives clients instant confidence and clarity.

3. High-Converting Leads

Dual conversion strategy: Zod-validated brief forms with rate limiting + Direct pre-filled WhatsApp deep links (wa.me) for instant deal closing.

3. Admin Management & n8n Integration Hub

The platform includes a secured, role-based Admin Portal accessible at /admin with full control over the marketplace:

- Analytics Dashboard: Live metrics on workflow views, incoming inquiries, and lead conversion rates.
- Workflow Management (CRUD): Create, edit, publish/unpublish, and reorder workflow steps dynamically.
- 1-Click n8n JSON Importer: Upload or paste any n8n workflow export; the engine parses nodes into draft flows.
- Built-in Leads CRM (/admin/requests): Manage pipeline status (New -> Contacted -> In Progress -> Completed) with 1-click direct WhatsApp chat.

4. How This Business Makes Money (Revenue Model)

Revenue Stream	Description	Market Pricing (MAD / USD)
1. Setup & Deployment Fee	Installing and configuring ready workflows on client accounts	1,500 - 5,000 MAD (\$150 - \$500)
2. Monthly Maintenance Retainer	24/7 server monitoring, API token renewal, bug fixes	500 - 1,500 MAD/mo (\$50 - \$150/mo)
3. Bespoke Custom Engineering	Building complex AI agents or custom ERP automations	5,000 - 25,000+ MAD (\$500 - \$2,500+)

Client Presentation Script & Live Demo Playbook

How to pitch, demonstrate, and close automation clients during discovery calls

5. Ready-to-Use Client Pitch Script (Word-for-Word)

"Hello! What we've built is a comprehensive Automation Marketplace & Solution Hub designed specifically to help businesses scale without increasing headcount.

When a client visits your platform, they find proven, ready-to-deploy workflows tailored for their industry - such as 24/7 AI WhatsApp customer qualifiers, Shopify abandoned cart recovery, automated PDF invoicing, and Meta Ads instant CRM sync.

They can visually inspect every step of the pipeline, see the exact tools required, and reach out immediately via WhatsApp or brief submission. From your side, you have a private admin dashboard to track leads, manage workflows, and even import n8n blueprints with one click."

6. Step-by-Step Demo Flow to Show Your Client

Step 1: The Homepage Hero & Search

Show the modern hero banner and live search bar. Type 'WhatsApp' to showcase instant filtering across 6+ departments.

Step 2: The Workflow Catalog (/workflows)

Demonstrate filtering by Category, Platform (n8n, OpenAI, Shopify), and Difficulty. Show that the URL changes dynamically (shareable link).

Step 3: Workflow Details & Flow Viewer (/workflows/[slug])

Open 'WhatsApp AI Lead Qualifier'. Highlight the vertical pipeline viewer showing Trigger -> GPT-4o -> Router -> CRM Sync. Click 'Contact on WhatsApp' to show the pre-filled message.

Step 4: Lead Submission & Celebration

Click 'Get This Automation', fill the form, and submit. Show the confetti celebration effect.

Step 5: Admin Control & Leads CRM (/admin)

Login with admin@workflows.com. Show the incoming lead in /admin/requests, update its status to 'IN_PROGRESS', and click the WhatsApp icon to show instant client messaging.

Step 6: n8n JSON Import (/admin/import)

Paste sample n8n JSON and click 'Parse & Preview Nodes'. Show how it automatically detects nodes and creates a draft workflow.

7. Quick Access & Credentials

Local Web Server:	http://localhost:3000 (Run: npm run dev)
Admin Login URL:	http://localhost:3000/login
Default Credentials:	admin@workflows.com / admin123456
